## Introduction

Wordsworth the great nature poet, has rightly said

*Child is the Father of Man.*

This aphorism plainly identifies the potential of a child. Today's child is tomorrow's torch bearer. In other words, the future of the child is decided by the mother. The mother has a vital role in moulding her child. Childhood is considered to be the most receptive stage and a caring, sensitive and strong mother will always have a happy, secure, bright child. This reinforces the fact that there is a strong stimulus-response bond between the mother and the child. The child basically depends on the mother to fulfill its needs and the mother in turn needs to be well prepared to respond to the child's aspirations. 'SAMRAT ACADEMY' has ventured in discharging great moral responsibilities by tapping the strength of student teachers who would be professionally trained to give a new dimension to the future of the children..... the perfect second mothers to mould the future of the little ones.
